The amount of torque and horsepower it delivers over the RPM range is in direct proportion to the feeling it gives you when you roll on the throttle. We know what riders want from a motorcycle engine because we've been building them for 110 years. Project RUSHMORE gave us the opportunity to dial it in just right. We conducted thousands of road tests with real riders giving us feedback to build the next iteration of the legendary Harley-Davidsonr engine.Project RUSHMORE - InfotainmentMore sound. Purer sound. Big, full color touch screens. Switches that are located where you intuitively want them to be and can reach without removing your hands from the grips. miles. Looking for the technology and innovations that truly make the ride better. We went over the bike fender tip to fender tip. Project RUSHMORE - ComfortWe dialed in the comfort of our machines the hard way: over thousands of miles in all kinds of riding conditions on every kind of street, road and highway ever laid down in pavement. Experienced riders and passengers putting in long hours in the saddle and giving us feedback on every aspect that contributes to comfort on the road. Project RUSHMORE - ConvenienceIf you want the ride to be truly epic, you have to sweat bullets to make the little things work exactly right. This is what Project RUSHMORE was all about. Now you have saddlebags and Tour-Pakr luggage carriers that can be easily opened with one hand. Compartments that open with one touch. And we've increased the storage space on these new machines without ruining the sleek, road-eating look of the bike. - Contact Motorcycle Sales at 888-933-7674 or bob@usedmotorcyclestore.com for more information. -
