Harley-Davidson Touring bikes, infused with enhanced style, outstanding aerodynamics and optimized touring ergonomics for rider and passenger- the full influence of the customer-led Project RUSHMORE product-development effort. Propelled by the unrelenting performance of the Twin-CooledT High Output Twin Cam 103T powertrain, a big part of the effort has gone into finding ways to help riders pass faster, stop quicker, brighter Tour-Pakr luggage carrier lighting, brighter turn signals, brighter brake lights, and a steering head with stiffer front forks. The bikes are better then ever. Project RUSHMORE control. An invitation to see how good you can be, you deserve better sound than most people have in their living rooms. More sound. Purer sound. Big, full-color touch screens. Switches that are located where you intuitively want them to be and can reach without removing your hands from the grips. Voice activation for your music, and eyes, is infinitely better. Feel Starting with the days when early riders bolted plastic windshields to their machines and began crisscrossing the country, the Harley-Davidson Touring motorcycle has already gone places no one could have imagined. We began Project RUSHMORE to discover what comes next. When it came to rider comfort, that meant getting in the saddle and putting in miles. Thousands of miles, over every sort of pavement the road could throw at us. Experiencing every sort of condition Mother Nature could throw at us. We used the info to dial in airflow, passenger space, back rests, seat textures, legroom and hand controls and anything else rider and passenger feel - Contact Motorcycle Sales at 888-933-7674 or bob@usedmotorcyclestore.com for more information. -
