Yamaha's high-revving sportbike heritage (it competes and wins regularly in MotoGP) develops max power at 10,750 rpm for maximum velocity.

The Yamaha YZF-R3 is powered by a liquid-cooled 321cc, DOHC inline twin-cylinder, 8-valve engine with a 180-degree crank design. Forged aluminum pistons (same tech used on the mighty R1 and R6 models) contributes to higher rpm with its lighter weight. The final drive combines a 6-speed wet multi-plate clutch and chain, with digital Transistor Controlled Ignition (TCI) and fuel injection for smooth roll-on feel whenever you need it.
