Take the brand-new SCR950 for instance, this Bolt-based scrambler takes on an entirely new personality despite sharing much of that cruiser's core components.

Yamaha has been making a habit lately of building incredibly fun, amazingly affordable machines that make you just want to get out and ride. After spending a solid day in the saddle of the SCR950 riding around the mountains near San Diego, I can report that Yamaha has once again nailed the less-is-more formula.
