Body:	Coupe
Exterior:	Black
Engine:	351ci Cleveland V8
Interior:	Black
Transmission:	ZF 5 Speed Manual
Mileage:	59,000
Drivetrain:	Rear Wheel Drive

This 1971 DeTomaso Pantera is a black-on-black "pre L" that was acquired from its second owner. Power hit pavement from a 351ci Cleveland V8 paired with a ZF five-speed manual gearbox. Modifications include a Holley carburetor attached to an Edelbrock intake manifold, Wilwood Superlite disc brakes, adjustable coilovers, aluminum high flow radiator, Mallory ignition system, Momo steering wheel, polyurethane suspension bushings, performance exhaust system, and more. An oil change was conducted approximately 200 miles ago along with coolant and brake fluid flushes. This Pantera is offered with manufacturer's literature and a clean/clear Arizona title.

The car underwent a color change from yellow to black in the 1980s (according to the last owner), and the stock side marker lights were removed during the process. Features include chrome split bumpers front and rear as well as quadruple exhaust tips. Please note although the paint looks nice in the pictures and shows well in person there is a small amount of wear and tear to the front valance as well as small blemishes and scratches in the nose, right rear, and roof.

Campagnolo wheels measure 15"x8" up front and 15"x10" out back, with Kelly and BFGoodrich tires fitted respectively. Wilwood Superlite II brakes have been fitted along with braided stainless steel hoses. Suspension modifications include Pantera Performance adjustable coilovers, billet aluminum sway bar caps, and polyurethane bushings.

The cabin is upholstered in black and equipped with a center console featuring a gated shifter for the five-speed manual transaxle as well as an armrest storage compartment. Replacement items include a three-spoke Momo steering wheel and VDO auxiliary gauges. A Pantera-branded "radio delete plate" has been placed in the stock radio location.

The five-digit odometer shows 59k miles, approximately 200 of which

have been added over the last 16 months. Please note all although the air conditioning system comes complete it is however inoperable and in need of a replacement hose & system recharge.

As mentioned above the 351ci Cleveland V8 is equipped with a Holley carburetor attached to an Edelbrock intake as well as a Mallory distributor, coil, and ignition box. Cooling modifications include a Pantera Performance aluminum radiator, a high-flow CFM "puller" fan, later-model extractor vents, stainless steel coolant tanks, and Ford green-stripe hoses. The battery has been relocated to the right rear and a remote positive post placed in the engine compartment. Power is routed through a ZF five-speed manual transaxle. Aftermarket exhaust headers and mufflers have been installed. An oil change and coolant flush were carried out approximately 200 miles ago.

- 59k Miles Shown
- 351ci Cleveland V8
- ZF 5-Speed Manual Gearbox
- Color Change in the 1980s
- Campagnolo Wheels
