This vehicle was sold new in wonderful state of Florida during September of 2014. In June of 2014 with just a little over 4000 miles on the odometer a computer control module was replaced. Then again in November 2014 another module was replaced. And again in March of 2015 another computer control module was replaced. In April of 2015 the horn was replaced. October of 2015 a computer module was replaced once again. Finally in January of 2016 this vehicle was bought back by the manufacturer much to the relief of the original owner. The reason for the manufacturer buy back according to Carfax was because of a stuck right turn signal, the horn failed, and random dash lights. All the mechanical / electrical failures happened prior to 15,691 miles. Because of the manufacturer buy back this vehicle has a branded title with the designation of a Lemmon Law Buy Back.
