Exterior:	Red
Mileage:	0

Vehicle Description

NO DRIVERS LICENSE REQUIRED!

This electric scooter is a must have for anyone who has no drivers license. Being fully electric with pedals, the State of Florida has deemed this to be a bicycle. There is no need to use the pedals. Just hop on your new beast, twist the throttle and away you go. This scooter will go about 30 miles on a single charge. Just plug your scooter into a regular household plug. No specialty plugs, wires or equipment required. No tag and no insurance needed. This new model even allows for the pedals to be folded and moved out of the way while driving.

Looking for something to get you around town or back and forth to work without breaking the bank? This is the right bike for anyone looking to save on their transportation costs. Gas prices fluctuate all the time; whereas, the cost of electricity stays relatively flat. No one wants to flush their money down the drain. With the money you save on gas, the scooter will end up paying for itself.

Other stores around town offer electric scooters. Don't get hoodwinked by other bike shop's "low watt" electric scooters. They simply cannot provide the power that our higher powered electric scooters have. Turn the throttle and go, our electric scooters will get you where you need to go, stress free and completely street legal.
