We are proud to offer you this 2003 Chevrolet Corvette Z06 Procharged with Many Upgrades for sale!

This 2003 Chevrolet Corvette C5 Z06 is a member of the fifth generation of the most iconic American sports car, and this specific example has been highly modified to be a completely unique performance machine. Under the hood is a completely built, procharged 5.7-liter LS6 V8 engine that makes over 600 horsepower and has had over \$20,000 in modifications made to it. This engine has also been equipped with Diamond Racing pistons, Thompson Motorsports performance camshaft, and a Thompson Motorsports crankshaft, among many other modifications.

This high-output powertrain works in tandem with a six-speed manual transmission designed to handle every piece of power that can be put through it. And, with a rear-wheel drive system for power delivery, the Corvette is an absolute thrill to drive. Better still, the aftermarket Borla exhaust system produces the engine noise of a thousand iotas of pure, undiluted power being discharged violently into the world. In other words, there's hardly a better sound on the planet.

To us, what's outside the car is just as important as what's inside it, and this iconic Corvette is no exception. The striking sports car has been designed from the ground up to exhibit a progressively more modern take on the original 'Vette, and we take great care to restore and maintain a condition as close to brand-new as possible. This specific Corvette has been wrapped in a sinister matte black, and it

comes equipped with a set of 19" CCW forged alloy wheels that simply command the attention of anyone who happens to be near the car. And with the inside equipped with pillar-mounted boost and fuel pressure gauges, there's no doubt that this Corvette has been designed to do one thing: perform. With its instantly recognizable silhouette, this coupe is a vision of what can only be considered to be a masterpiece of an American icon.
