2012 Honda Ruckus

Reeds Motorcycle is proud to present to you, a different bike for a different experience on "Two Wheels".

The Honda Ruckus will not wow you when it comes to modern-day design aesthetics, but the retro look will certainly have its share of admirers. The Ruckus is a scooter from Honda that sets a new standard for cool; you can take many benefits from it because it's so agile, user-friendly, and easy to park. The design of the Ruckus is 'unique.' From the bare-bones frame to the double headlamps, the low seat and the wide tires, the Ruckus will definitely cause a scene wherever it goes. More than just its design, the Ruckus also carries an impressive powertrain set-up: a 49 cc four-stroke engine that can run for hours on very little gas along with the engine's strong low-end torque and the V-Matic automatic transmission. Furthermore, the electric starter offers you faster get-up-and-go. When you wish for

discovering some out-of-the-way places, the
oversize deep-tread tires will help you.

Combining a minimalist design with an
impressive engine, the Honda Ruckus will
define your riding experience like no other bike
of its stature can.
