Excavator Features:

1. Agrotk ym-12 mini excavator adds a pressure-reducing valve device, which makes it easier to start when the machine starts. (Gasoline)

No pressure reducing valve, hard to start the machine.

2. Boom can be deflected by 60 degrees turning left and right, making the job more flexible.

Other factories can only design fix boom or just turn by 30 degrees.

3. Crawler can be stretched from a minimum of 32.68 to a maximum of 39.37 in which and can pass through more narrow places.

Other factories' wheelbases can be only designed to fix at 35.83 in.

The Agrotk YM-12 is built in China and the important components on the machine from developed countries. The main hydraulic pump is from Japan, Main valve, swing motor and travel motor from Italy and Hydraulic pipes are from Germany. Very well built machine.
