Vehicle Description

Running on a 48-volt system, as well as a 12.5Ah battery provides plenty of power to help get you where you are going. The locking removable battery located beneath the bike’s saddle, not only keeps the center of gravity low and overall weight well-balanced, but also makes it convenient and easy to charge.The fat rear wheel can crank out a continuous 500 watts of power with the ability to ratchet things up to over 750 peak watts of power for hill climbs and quicker acceleration. This bike comes with a super bright tail light visible to motorists over 1500 feet away, providing safety on the darkest night. Every time the brakes are applied, the brake light will be activated through the main battery pack. 160mm disc brake for plenty of stopping power. Compact yet clear backlight display makes it easy to see all of your relevant information in an instant The display provides information about battery capacity, time, pedal assist level, speed, and range. The simple to use folding feature on the main frame tube and telescoping stem allows this bike to fold into a compact shape, great for transport and storage. This fat tire foldable bike is perfect for biking novices and seasoned bicyclists as well. Perfect for camping, traveling or just riding around the neighborhood.
