Additional pictures are posted on I-95 Muscle's direct website.

Check out this 1999 SVT Cobra with a cammed up 32 valve 4.6L V8, 5 Speed Manual, and positraction unit with big meaty rear tires. The modification list on this car is long considering an odometer with less than 43k miles. Aside from the black wheels that you see, it has a line lock system installed, battery relocation, as well as an electric power steering conversion. The full exhaust is all new behind the headers with high flow cats, an X-pipe, and Flowmaster super 10's that shoot the perfect sound out of Flowmaster dual slash tips. These cars rewrite the script for high horsepower performance cars in the late 90's and without their success we wouldn't have the 750 horsepower GT500s roaming around today. The exterior seems to be in great shape with no clear coat failure. The front leather seats show minimal wear and the rear seat has been replaced with cloth seats from a different car. It's built to perform and is ready for a new driver that can put it to work. Financing is available and trades are welcome. Call, click, or come by today!
