The light on the tach does not work and
the compass some times works, otherwise
everything works, Dash is not cracked,
has a Clarion CD player, very 90's correct.
I do not have the original, Heck it even
has the original floor mats. (not photo'd)

This one is a little different story than
most. This one has been in my garage for
the past 4 years.

Being a 3rd gen car dealer. I can not
keep anything, no matter how long I

keep anything, no matter how long it
looked. I have told dozens of people that it
is not for sale. But again I can not keep a
vehicle, its not in my nature. So it is for
sale.

it spent the 1st 14 years of its life in SE
Tennessee, Then went to NV for 7
years, then in 2018 a friend brought it here
and I have had it in hiding since 2020..

Fresh Brake Job, Tires 2 years old, maybe
100 miles on them.
I would drive this Bronco any where with
out a second thought.

It does have 189k miles on it. It would pass
for 30k miles inside and out. If it had super
low miles it would be double the price or
more! Some of these 4th Gen Broncos are
bringing It does have small transmission
leak, I am thinking its the pan gasket.

Its to old for us to warranty it, and it is to
old for our banks to finance it, so if you
need financing you will want to speak to
your banker.
Trades ins are welcome. You will have
to search along time to find a nicer one in
this price range!
