1973 VOLKSWAGEN BUG DUNE BUGGY

MANX REPLICA

RUNS AND DRIVES GREAT

GROOVY 1970's VIBE!!!!

We recently purchased this super cool 1973 VW dune buggy with a Manx style body on it. This is a perfect entry level collector car that can be very fun, make a lot of memories, and not a huge investment. Perfect machine to hit up local cruise nights, car shows, or zip around downtown.

This has all the looks and thrills of a true Manx buggy, but without the huge price tag. True Manx buggies are in a much higher price range. This replica is great because you can actually enjoy the car and not be on edge about your \$50,000 investment.

She is powered by the VW 1600cc flat 4 and 4 speed transmission. Fires up, runs through the gears, and does everything like it should. The previous owner replaced the clutch, flywheel, pressure plate, throw-out bearing, and went over the front end suspension.

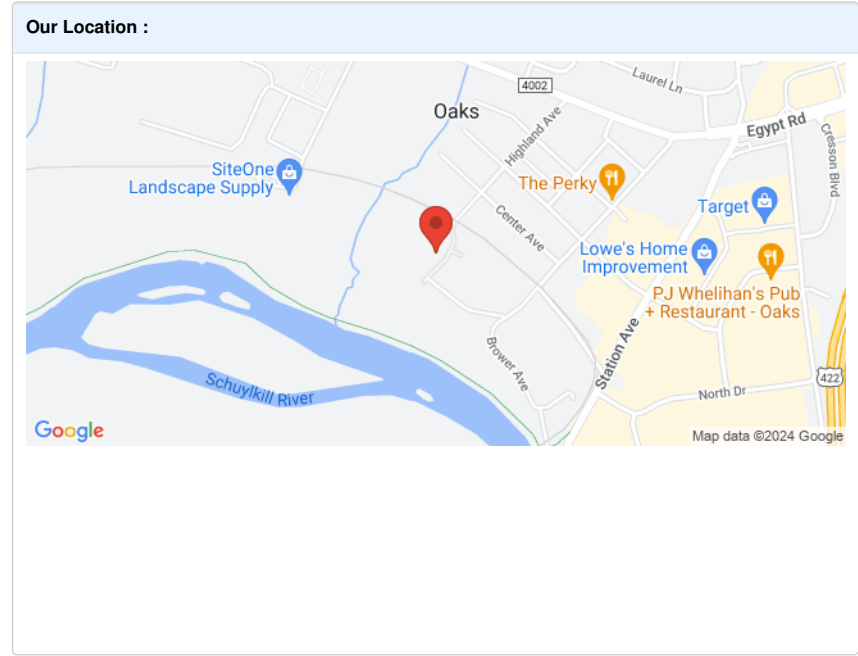

Overall it has a great look to it. Orange paint shines nice. No body damage. Interior is entry to mid level custom. Not glorious but certainly works.

These cars are just as much fun to work on as they are to drive. That is a good thing because like all old vehicles they require a little TLC. The new owner of this machine should not be scared to roll up their sleeves and have some fun spinning some wrenches!
