Additional photos are available on I-95 Muscle's direct website.

You will not find a nicer example of a CLEAN C5 Corvette than this Magnetic Red Metallic beauty! With only 21K miles on the odometer it looks like it was built, assembled and sold off of the showroom floor last month. Everything from the convertible top to the tires look absolutely amazing and leaves you wanting nothing else. In completely stock form these Corvettes push 345 HP out of that factory LS1 sporting an aluminum block and aluminum heads. The C5 came with a manual convertible top which just means less to break. They are very easy to put up and down. Sometimes simpler is just better. The C5 is the first time that the transmission (in this case a 4-speed automatic) was placed in the rear of the vehicle helping to create that near perfect 50/50 front to rear weight ratio. All of these things add up to a car that has tons of power, weighs very little and handles like it's on rails. We encourage you to swing by and see how nice this car is in person because believe me, pictures don't do it justice. If you haven't already, check out the video to the right and remember, financing is available and trades are welcome.
