* Please note, if you are looking for a perfect car please look elsewhere - there is simply no such thing as a perfect Subaru with over 130K miles - this one is very presentable and in above average condition, but it has some typical Subaru wear spots - after 2013 Subaru started using synthetic materials on their steering wheels - this one shows some usually delamination around the steering wheel - can be addressed with a a DIY kit from Amazon/eBay which replaces the vinyl material with leather. Same story is with the armrest... on top of that there are a few small nicks and scratches around the car, which is very normal given its

age and mileage! Third party inspections are welcomed and encouraged! We have nothing to hide!
